# What we rent and tips on selecting the right equipment.

## General Mountaineering Ice axe

We have a selection of Grivel, Climbaxe and SMC ice axes.

If you are 5'10" a 70cm axe is about right. If you are shorter choose a 60 or 65cm axe. For a height of 6' a 75cm tool would be best. Rarely will anything longer than 80 cm be required

## Technical ice axe and Technical ice hammer

We use Black Diamond X-tools, and Charlet Moser Quasars and Pulsars. These are 50 or 55cm for everyone

## Mountaineering crampons

We have a selection of Grivel, and Charlet Moser crampons. The modified strap system on these allows them to be used on a flexible soled boot. They are generally one size fits all, but if you have a very small or large boot we may have to use a different pair so let us know.

## Technical crampons

We have a selection of Black Diamond Switchblade, and Charlet Moser crampons. These have a step in binding system with a toe-bale and a heel clamp so they need to be used on a rigid soled boot. They are generally one size fits all, but if you have a very small or large boot we may have to use a different pair so let us know.

## Helmet

We have a variety including the light and comfortable BD "Half Dome" models.

## Harness (includes belay plate & locking carabiners)

We use Black Diamond Alpine Bod Harnesses.

## Ski Poles

We use adjustable BD two section poles that also double as avalanche poles. Use these for hiking or with snowshoes.

## Mountaineering Boots

We have available a size run in Scarpa rigid leather boots and a run of Boreal leather general purpose boots. We do not have very small or very large boots. Please talk to us about boots if you need them since this crucial item can make or break a trip.

## Rock Shoes

We have several size runs in a variety of shoes. To ensure best fit we will often bring a size above and a size below what you ask for. We like the shoes to be snug but not agonizingly tight especially for long climbs where you will be on your feet all day.

## Other equipment.

We can arrange rentals with Eastside Sports and Mammoth Mountaineering Supply for;

Leather mountaineering boots

Plastic climbing boots

Sleeping bags

Backpacks

Sleeping bags

Telemark ski equipment

Randonee ski equipment
